

Latitude – L

- Rectilinear profile with an L-shaped ledge to visually separate the upper housing
- Ridges on upper housing to add interest and reflected brightness
- Sculpted end cap is available to emphasize the clean, rectilinear shape

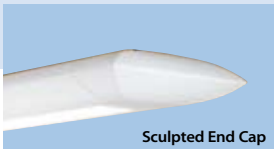

Latitude – LS

- Rectilinear profile with L-shaped ledge and lamps “stacked” into separate uplight & downlight chambers
- Uplight can be controlled independently of downlight (for example, daylight dimming on uplight and user switching on downlight)

Latitude – C

- Curvilinear profile with C-shaped sides that add brightness by reflecting light from the ceiling
- Sculpted end cap is available to emphasize the thin, curved shape

Features	Benefits
High performance optics	Results in 85-90% fixture efficiencies and wide spread uplight distribution
Choice of shapes	Gives design flexibility for curved or rectilinear design statements
Choice of lamping	One- or two-lamp T5 or T5HO for – L and – C; two- or three-lamp T5 or T5HO for –LS
Shielding options	Choice of white baffle (BW), soft glow lens (SGL) or VCOptic (VC1) lens
Extruded aluminum housing	Emphasizes the long, clean lines of the Latitude family
Stacked lamp design in — LS	Enables independent control of indirect light from the direct light
CS Control Solutions	Fully integrated sensor and control technologies for energy savings
C2C Silver Certified	Ensures that the product and the manufacturing meet sustainability criteria

LATITUDE™

The Latitude family of fixtures provides both high performance and great aesthetics from small-scale extruded fixtures for T5 and T5HO lamps. These fixtures combine the comfort and pleasantness of indirect lighting with the controlled brightness and visual appeal of VCOptic lenses. Integrated control solution options allow the designer to maximize energy savings, while sculpted end cap options enable design aesthetics.

Design elements

- Sleek, unobtrusive shapes allow the lighting design to accompany any style
- Small-scale profiles add sophisticated styling to all designs

VCOptic™ VC1 Lens

- VC1 lens is available for the L, LS and C
- VC1 lens partners an innovative optical film with a clear grooved lens adding visual interest
- Highly efficient diffusion produces uniform brightness with controlled luminances, obscured lamp images, and a controlled intensity distribution

VC1 lens
