## Wall/Slot® 2000

The Wall/Slot 2000 perimeter lighting system provides a continuous lighted slot at the ceiling and the wall. The lamps are completely hidden from view, even when directly beneath the luminaire. An innovative optical system minimizes socket shadows and produces a clean line of light at the perimeter of the space.

U.S. Patent No. D329,299

### Design elements

- Continuous, shadow-free wall lighting, even around corners
- Easy installation onto wall-mounting rail
- System connectors allow continuous slot around a room, even around corners
