

sustainable lighting for

government

Lighting that works at all levels of government

LITECONTROL

government lighting

Use the chart below to stimulate your thinking for government lighting projects. A check mark indicates a popular application for the Litecontrol fixture family listed in the first column. The last row shows the control solutions available from Litecontrol for each space. Visit litecontrol.com for full product details.

1. Arcos pendant and wall fixtures in a graceful, curved shape

2. Ciros architecturally detailed pendant fixtures

3. Inde-Pendants round pendant and wall sconce fixtures

4. Latitude small-scale pendant fixtures for T5 lamps

5. LC indirect/direct pendant fixtures

6. Litewave recessed direct baskets and lens fixtures

Litecontrol leads the industry in sustainable lighting. Our architectural lighting fixtures were the first to achieve the coveted Cradle to Cradle Certification from MBDC. The Cradle to Cradle process evaluates every aspect of the materials we use – are they environmentally safe and healthy? Do we use recycled content in our materials? Can our materials be recycled after use? And it assesses every aspect of our factories – do we use energy efficient equipment and systems? Do we incorporate wise water stewardship practices? Are we seeking to expand our use of renewable energy in our factories?

All of the products manufactured in our two Massachusetts-based factories received the Cradle to Cradle Silver Certification in December of 2007. And our certification was renewed in each year since then, as we continue to improve the sustainable aspects of our products and processes. Only Litecontrol's lighting systems offer you the assurance that C2C Certification brings to your sustainable design goals. To learn more about C2C Certification, please visit litecontrol.com.

Major Government Projects

Over the years, our fixtures and control solutions have been featured in many government projects. Here is a partial listing.

ATF Headquarters
Washington D.C.

National Institute
of Health
Bethesda, MD
