Litecontrol and Armstrong TechZone™ Ceiling Systems

Armstrong TechZone™ Ceiling Systems organize lighting fixtures, air diffusers and sprinkler heads into a linear “technical zone” to create a cleaner, less cluttered appearance. The linear technical zones coordinate visually with Armstrong Optima® and Ultima® fine textured ceiling panels. Lighting fixtures and air diffusers are available in lay-in and tegular styles to ensure that all components align precisely for a coherent, unified look across the ceiling.

Litecontrol’s TechZone™ lighting fixtures include recessed Mod fixtures in 6" and 4" widths. Both widths are available in 4' and 5' individual fixture lengths, and the 6" wide fixtures are also available for continuous runs in compatible TechZone™ Ceiling Systems. A diffuse soft glow lens and a white blade baffle provide options for light distribution and brightness control. The recessed Mod fixtures can be complemented with wall-mounted and pendant-mounted Mod fixtures, allowing the designer to achieve clean, rectilinear lines throughout the space. Other Litecontrol pendant fixtures are also compatible with the TechZone™ Ceiling Systems.

Perfect fit in any ceiling style

4" Mod depicted here. For complete product details see online technical sheets.

Pendants

Arcos™

Ciro's™

Mainstream™

Mod-22xa

Vivid™

Litecontrol pendants are also TechZone™ compatible.

Specify Litecontrol fixtures with confidence.

Litecontrol's partnership with Armstrong assures you that our fixtures have been fully evaluated and approved by Armstrong for proper fit and finish in TechZone™ Ceiling Systems. Other manufacturers may claim that their fixtures are compatible, but only those listed by Armstrong as official partners for the different TechZone™ systems have succeeded in the rigorous evaluation process. Litecontrol's partnership includes all of the current TechZone™ systems. Approved TechZone™ lighting partners are shown at www.armstrong.com/TechZone.

All Litecontrol TechZone fixtures are Cradle to Cradle Silver Certified™ by MBDC.

TechZone™ Options	Products	Ceiling Styles
4" Linear	Mod 44TZ	15/16" Lay-in 9/16" (Narrow Face) Lay-in 15/16" Tegular 9/16" (Narrow Face) Tegular
6" Linear	Mod 66TZ	15/16" Lay-in 9/16" (Narrow Face) Lay-in 15/16" Tegular 9/16" (Narrow Face) Tegular
6" Continuous Linear	Mod 66TZC	9/16" (Narrow Face) Lay-in 9/16" (Narrow Face) Tegular
Pendants	Choose from any Litecontrol pendant fixture including: Arcos, Ciro's, Mainstream, Mod-22xa, Vivid	All Ceiling Styles

Look for Litecontrol for your next TechZone™ project.

In terms of sustainability, Litecontrol's efficient lighting systems can enable LEED credits for energy efficiency. The Cradle to Cradle Certification can help earn a LEED credit under Innovation in Design. Also, the combination of TechZone™ and High Light Reflectance Optima® or Ultima® ceiling panels can contribute to LEED® credits for recycled content, daylighting and energy consumption.
