

Wall/Slot® 2100

The Wall/Slot 2100 system provides perimeter lighting from a small-scale profile, with the lamps and lenses completely hidden from view. The 6" height of the fixture works well in spaces with restricted plenum depths, and the 6" width provides a narrower slot than other fluorescent Wall/Slot products.

Design elements

- Concealed light source creates a floating ceiling effect
- T5 or T5HO lamping
- Semi-specular reflector option boosts light down wall
- Easy installation onto wall-mounting rail
- Contractor-friendly access to lamp and ballast compartment for maintenance
- 6" by 6" profile for restricted plenum depths
- C2C Silver Certified^{CM}
