

New Latitude-LS

## LATITUDE™

### Lighting with Attitude

Latitude is our new family of sleek, unobtrusive fixtures that use T5 or T5HO lamps, ideal for office and other commercial settings. Latitude fixtures are indirect/direct pendant fixtures that balance the comfort and pleasantness of indirect lighting with the efficiency of direct lighting. Latitude provides high performance, small-scale fixtures that don't compromise the integrity of a designer's vision.

**Latitude-L and LS** offer a ledge-shaped rectilinear profile, while **Latitude-C** provides a crescent shape that accentuates the slender, linear form. All fixtures are Cradle to Cradle Silver Certified<sup>CM</sup>.

(shown with soft glow lens  
and flat end cap)

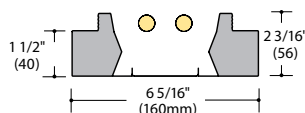

## Design elements

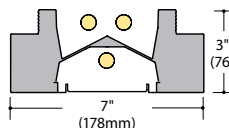

- Cradle to Cradle Silver Certified<sup>CM</sup>
- Extruded aluminum housings
- Sculpted end cap designs (available on C & L)
- Fixture efficiencies of over 85%
- Upper portion of housing reflects light from ceiling for balanced brightness
- **Latitude-C** is just over 2" high and 8" wide, with an upper and lower curve that meet in a central ridge
- **Latitude-L** is 1 1/2" high and under 6 1/2" wide for a minimalist profile
- **Latitude-LS** is 3" high and 7" wide with the flexibility of separate up and downlight
- One- or two-lamp T5 or T5HO (three-lamp available in LS)
- New VCOptic™ (VC1) lens partners an optical film material and a clear grooved lens resulting in highly efficient diffusion for maximum visual comfort
- White blade baffle (BW) and soft glow lens (SGL) also available
